European Health Data Space - User perspectives

MyHealth@EU

Empower citizens to have control over their health data

Better diagnosis and treatment, improved patient safety, continuity of care and improved healthcare efficiency

Enable healthcare professionals to have access to relevant health data

Health data in registries

Electronic health records

HealthData@EU pilot

Assist policy makers and regulators in accessing relevant health data

Facilitate access to health data for innovators in industry

Grant access to health data for researchers

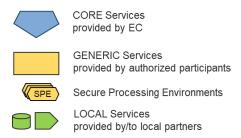

Better health policy, greater opportunities for research and innovation

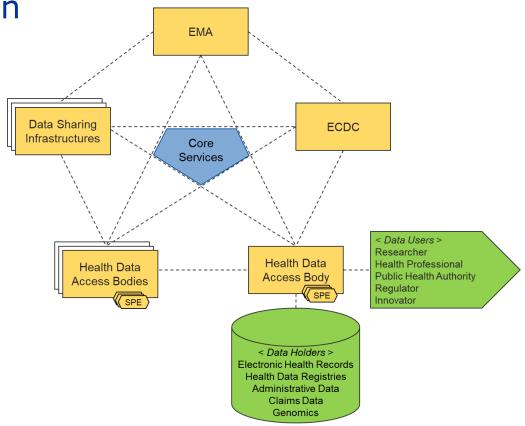

Slide extracted from the EHDS Pilot GA Oct 2023, Courtesy of M. Berneaux, EC Policy Officer

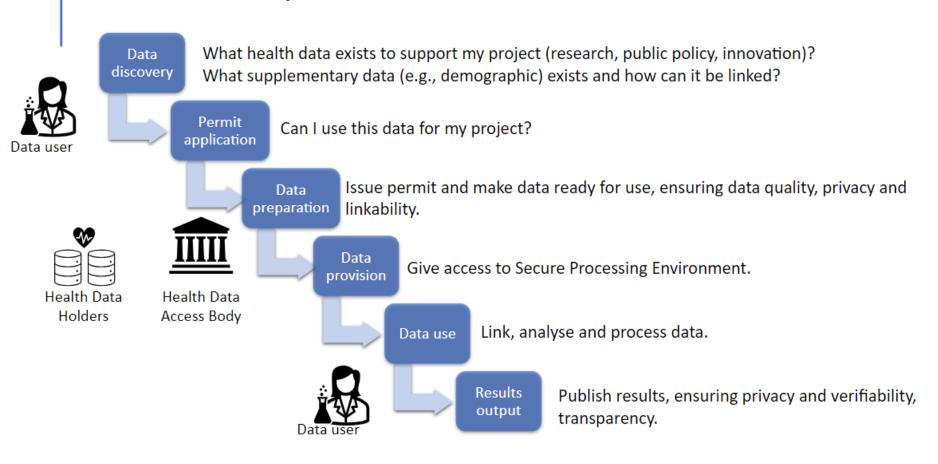

HealthData@EU – a vision

- New infrastructure for secondary uses of health data
- Connecting health data access bodies and data sharing infrastructures
- Several health data access bodies are established, or in the process, across Member States

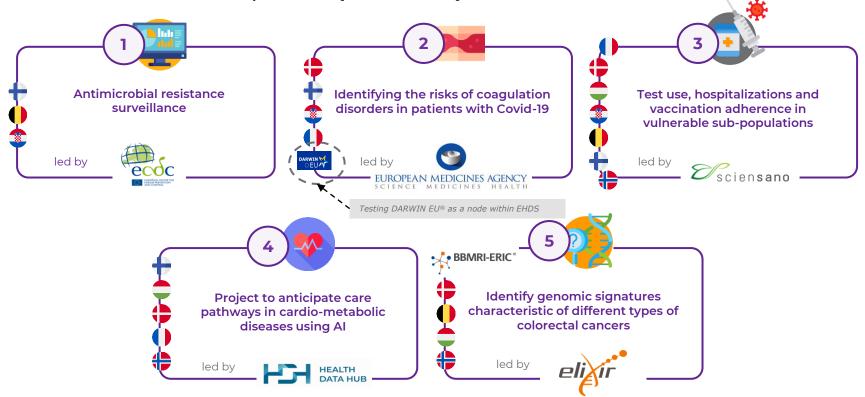

The User Journey

HealthData@EU pilot

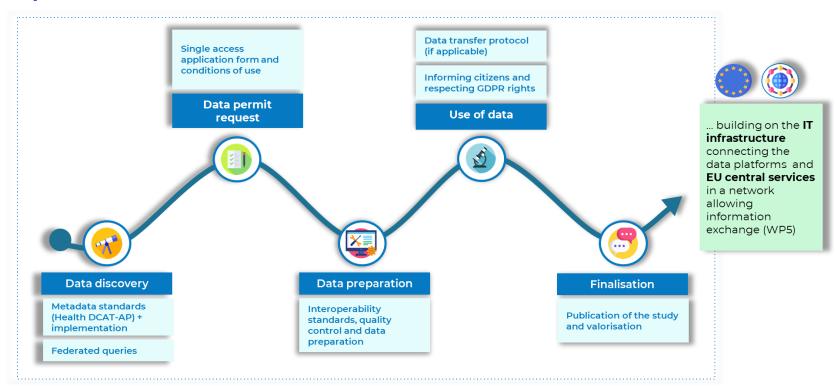

A 2-year pilot kicked off in Oct 22 - **Five use cases** to inform design, development, and deployment of HealthData@EU frameworks (**secondary use of data**)

Expected results

Connection with ENCePP Guide on Methodological Standards

- Checklist for protocols Development of study protocol - Statistical analyses (chap 12) Study design (chap 3-4) - Data protection & ethical aspects (chap 15) - Specific topics (chap 16) Data transfer protocol infrastructure - HMA/EMA catalogue/list of metadata - Approaches to data collection (chap 8) - Research networks for multi-database EU central services studies (chap 9) - Quality management (chap 13) - Dissemination and Research networks for multi-database studies (chap 9) communication of study - Methods (exposure, bias & confounding, effect modif. – chap 5-7) results (chap 14)

EHDS & HealthData@EU Opportunity to enable a Rapid, Wide and Deep access to healthcare data?

Opportunities

- Increased EU representativeness in studies (geographic coverage, care settings, size of studies...)
- Rapid, Wide, Deep access to healthcare data to support better and faster decision making

Enabled by

- Implementation & readiness potential tensions between common EU vs each MS interpretation and/or timelines
- Transparency & trust adopted mechanisms need to remain compatible with the need for rapid, wide and deep secure access
- Data access smooth governance & interoperable infrastructures
- Data protection & data security balancing anonymisation and pseudonymisation with possible tensions related data linkage

Closing

- > EHDS has the potential to strengthen observational research and the use of RWD/RWE
 - > Rapid, Wide and Deep access for secondary use of healthcare data
- > Transparency, trust and collaboration are key instruments
- ➤ ENCePP work has been paving the way in many areas of the user journey
- > Monitor progress and ensure connection and input in the implementation

Any questions?
