ENCePP Working Group on HTA

Report to ENCePP Plenary Meeting
12 November 2013

Presented by: Marlene Sinclair, WG Chair

An agency of the European Union

Revised work-plan and mandate

- Regular meetings: ongoing review of mandate/workplan
- Clear concept has emerged of potential role of ENCePP in conducting studies/generating evidence that supports decision making by regulators and by HTA bodies (*focus on capacity building*)
- ISPOR November 2013: poster and workshop communicating on ENCePP and the HTA WG in exploring the interface between medicines regulation and HTA (*these will be published on the ENCePP website*)

Proposed survey of ENCePP on HTA-relevant research

- Proposal is for a survey of the network to
 - ❖ Identify experience in conducting studies that have already supported HTA
 - ❖ Identify needs of centres with core epidemiological experience/resources to enhance their capacity to undertake studies to support HTA in the future
 - ❖ Map expertise/resources and reflect in Resources Database

- WG now focussed on survey – look forward to results
